Public Comment

Date 6/28/98

The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary).

Comments: My reason for commenting on the Calfed program is that I fear we have not learned the lessons that the past 70 years of water management should have taught us. We continue to build in flood plains; we continue to subsidize some agricultural areas at the expense of other people and the environment; we continue to deplete and pollute precious ground water; we continue to ruin fisheries and watershed areas; and the list of problems goes on and on.

Nothing in Calfed's three alternatives thus far indicates a willingness to examine the causes of these problems. It appears that Calfed simply wishes to do more of the same, namely, to build more dams and send more water south. We can do better than this.
